## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16,24-33,42-44, drawn to a hybrid lighting system, classified in class 362, subclass 576.
  - II. Claims 17-19,34-39,drawn to a light source with plural reflectors, classified in class 362, subclass 298.
  - III. Claims 20-23, drawn to a solar collector, classified in class 126, subclass 569.
  - IV. Claims 40-41, drawn to a light pipe with heat shield, classified in class362, subclass 583.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Groups I-III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions of Groups I-IV all have separate utility such as Group I-a lighting system using both natural and artificial light, Group II-a beam changer for artificial lights, Group III-a solar collection system for providing solar heat and Group IV-a light pipe system for eliminating heat generation from a source having an infrared light component. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have

acquired a separate status in the art as shown by their different classification, restriction

for examination purposes as indicated is proper.
